

Family History Files

Available at the Gwinnett Historical Society

The content of the family history files is dependent upon the material contributed to the Gwinnett Historical Society by members and visitors, as well as that collected by the volunteer staff from newspapers, archive collections, and special projects. We encourage you to contribute any family data that you might have so that others may benefit from your research to date. There may be more than one file for any given surname depending upon the volume of information contributed for a given family. A file may contain a single slip of paper or a complete family history. You may also find photographs, newspaper clippings, pedigree charts, correspondence, queries, family histories, and cross-references for the given surname to other family history files.

NOTE There is a small charge for photocopies of any material found in a family file to help defray our cost of providing this service.
